

RoHS declaration

The European RoHS directive 2002/95/EC and its amendments restricts the use of certain hazardous substances in electrical and electronic equipment.

The concerned substances are:

- Mercury
- Lead
- Hexavalent chromium
- Cadmium
- Polybrominated biphenyl (PBB)
- Polybrominated diphenyl ether (PBDE)

Most of the products sold by Hager are not in the scope of the directive.

Nevertheless we have decided to have for our products a voluntary compliance to the RoHS requirements.

Almost all of our delivered Hager products are in conformity with the requirements of the directive and the maximal levels fixed in the directive for these 6 substances are not exceeded.

If you have any complementary question, please contact your partners from sales and service or send us an email to rohs@hager.com.

Blieskastel, 29th September 2011

Dr.- Ing. Dominique BECK
Standardisation and Business Environment Manager - Hager Group
